

# CALL FOR CONTRIBUTIONS

## for the Second Virtual Graduate Training for Sustainable Energy Development

Approaching Sustainable Energy Development in East African Countries  
through an interdisciplinary project on Microgrids

**September 5th to 9th, 2022**

We invite graduate students and practitioners to share their related current research topic and their relevant professional experiences during the virtual **Graduate Training for Sustainable Energy Development 2022** (September 5th to 9th, 2022). The presentations should be understandable for all participants, regardless of their academic or professional background.

The aim of the presentations is to create an opportunity for interdisciplinary exchange on scientific or professionally relevant topics related to **sustainable energy development**. The short presentations (approx. 8-10 min) can be a first impulse for further discussions about these topics or projects. The presentations of your project during the Graduate Training is an opportunity to talk to one another across disciplinary boundaries. It is very important to us to cover the spectrum according to professional diversity. We look forward to receiving applications from **electrical engineering, social sciences, education and didactics, and economic sciences** or related disciplines.

If you are interested, please complete the [online form](#) to submit your application by July 15th, 2022. We will then send you further information about the event in due time.

Please follow the guidelines on the next page:

SPONSORED BY THE

The application form includes the following sections among other things:

- first name and last name
- academic title (if applicable)
- university/institution/company
- e-mail
- a brief biography of the author
- title of the proposal
- the summary of the abstract/project with a maximum length of 150 words
- including up to five key words

Once the deadline has passed, the applications will be evaluated by the organizing team. After its decision, the organizing team will inform the applicants about their acceptance as soon as possible.

All presenters will receive a certificate for their contribution. The language of the event is English. Please submit your short abstract (150 words) by 15th of July, 2022 latest using the **online form**. Each participant is allowed to submit only one abstract. Presenters are also invited to participate in the Graduate Training.

### **Key dates**

- Graduate Training date: September 5th to 9th, 2022
- Deadline date for abstract submission: July 15th, 2022
- Abstracts must be submitted online via **this form**
- Notification of acceptance: August 5th, 2022

If you have any questions, please contact [microgridtraining@ei.upb.de](mailto:microgridtraining@ei.upb.de)

For further information on the A:RT-D Grids project please visit the [project website](#).

We look forward to reading your applications.
